

SIGN STANDS & ROLL-UP SIGNS

Hi-Viz, Hi-Quality, Hi-Performance

The OrangeGear® sign stands are durable and compact, easy to handle and store. They occupy a small amount of storage space when folded. Each leg is individually released with a kick release lever for added stability on curbs or uneven terrain. The riveted orange PVC caps at the end of each leg increases the visibility of the sign stand.

The OrangeGear® 4-legged sign stands come in a variety of styles. Aluminum or steel non-spring stands for roll-up mesh safety signs. Steel single spring stands for mesh, vinyl or reflective signs. Steel double spring stands for mesh, vinyl, reflective or rigid signs.

STAND FEATURES
